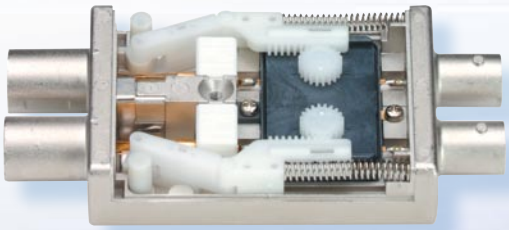
75Ω Standard Size Video Jacks

Applications
- HD-SDI
- Analog Baseband Video
- HDTV Upgrades (DTV)
- Satellite Headends
- CATV Broadband
- SMPTE 276M/AES3 Digital Audio

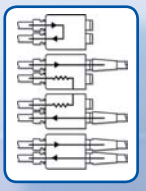
Features
1. 75 Ohm rating
2. Lifetime Warranty*
3. Rotary switch technology

Benefits
1. Low return loss (20dB or greater until 2.4GHz)
2. Guaranteed Canare quality
3. Longer-lasting, more reliable connections

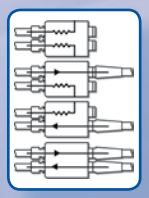
DVJA-W *Normal through, 2.4GHz*
DVJA-S *Straight through, 2.0GHz*



DVJA-W Normal Through
Signal routes between top and bottom BNC without the use of external looping plugs. Inserting a Canare VPC Video Patch Cord into either front WE port automatically terminates signal path into a 75Ω load.
Our most popular VJA model.



DVJA-S Straight Through
Two independent single jacks in a dual housing. Inserting a Canare VPC Video Patch Cord into either front WE port breaks the 75Ω termination for straight signal pass through. Very useful for bringing up auxiliary equipment to a designated central patchbay location.



Standard Video Patch Plugs
